Strategy for Invigorating China Through Science and Education

The strategy for invigorating China through science and education (科教興國) was unveiled by the CPC Central Committee and the State Council at the National Conference on Science and Technology held in May 1995. In the report presented at the 20th National Congress, President Xi emphasised that, to accomplish this goal, Education, Technology, and Talent are the three key elements driving national development.

As our school is committed to science and technology education, we deeply understand the importance of this mission and recognise that we must start by strengthening the fields of science and nurturing potential talent in education. The school is dedicated to fostering students' learning interests while enhancing their creativity, collaboration, and problem-solving skills. We place significant emphasis on the development of STEM education. Students are encouraged to explore their interests in this field through various STEM-related learning activities and projects. All the activities we organise represent the best combination of theory and challenging tasks, with a focus on student-centered, concept-oriented instruction that emphasises the development of problem-solving skills. Through hands-on projects, students can connect their learning to real-life situations. Under our efforts to promote STEM education, the school has received numerous local and international awards for its participation in STEM competitions and projects over the past few years.

The foundation for revitalizing the nation through science and education lies in education itself, and the core of education is excellent teachers. "A strong nation must first have strong education; strong education must first have strong teachers." In addition to establishing robust STEM development in the school, we recognise that we can truly cultivate students only by continuously enhancing the professionalism of our teachers. To this end, we organise annual training sessions in IT and STEM, enabling teachers to apply technology flexibly in their teaching and improve their understanding and application of science and technology. Additionally, we emphasise the importance of teachers' understanding of national development. This is not just about imparting knowledge; it is also about cultivating a sense of national identity, enabling them to educate the new generation to possess a sense of responsibility, vision, and commitment to the country.

Let us work together on the path of invigoration through science and education! Let us cultivate more outstanding talent for our country! Let us promote technological advancement with our ideals and aspirations!

"Love Our Home, Treasure Our Country - Hong Kong Primary and Secondary School Chess Sharing and Competition Experience"

Po Leung Kuk Organised the "Caring for the Country" Hong Kong Primary and Secondary School Students' Chinese Chess Sharing and Competition Experience event. The event provided a platform for students to learn about the formal rules, etiquette, and endgame exercises of Chinese chess. The event also deepened students' understanding of Chinese culture which places a great emphasis on mutual respect and social harmony.

It was an honor to invite Mr. Himson Wong, a representative of Hong Kong in the Asian Games, to teach the students chess skills and presented certificates as well as souvenirs to students. It was a valuable experience for students.

Our student and teacher Masters of Ceremonies introduce the Chinese chess competition experience to visitors.

Our student Master of Ceremonies takes a picture with Himson Wong.

Let's try out the Chinese chess!

Ching Tsz Long, a student of Class 3F, has a chess competition with Himson Wong.

Campus Journalist Training Program An Interview with the Student Chess Player and the Master of Ceremonies

Campus Journalists prepare for the interview.

On May 27th, our Campus Journalist interviewed 3F Ching Tsz Long and 3A Mai Ying Lin, the students who participated in the above event. They shared their thoughts about this traditional cultural activity.

Ching Tsz Long: By playing chess, I learnt how to stay calm when facing difficulties. It is important to learn from mistakes. Every move made by the opponent was strategic, making me rethink my own strategies. Although I ultimately lost, I learned how to stay calm under pressure, which has been helpful in both my studies and daily life.

Mai Ying Lin: Watching Mr. Wong and Ching Tsz Long play chess, I learnt how to play Chinese chess and the importance of mutual respect. The event also deepened my understanding of the Chinese culture.

Let's get ready for the filming!

Po Leung Kuk Tong Nai Kan Junior Secondary College & Po Leung Kuk Vicwood K.T. Chong Sixth Form College

The 3rd Joint School Swimming Gala

On January 17, 2025, Po Leung Kuk Tong Nai Kan Junior Secondary College and Po Leung Kuk Vicwood K.T. Chong Sixth Form College collaborated to organise the 3rd Joint School Swimming Gala. The event aimed to foster a healthy lifestyle while instilling positive values such as perseverance and responsibility.

Throughout the competition, the atmosphere was very tense. Nevertheless, the true essence of the gala was the bonding among participants which was more important than winning. Overall, it was an unforgettable experience for students.

Students are ready for the swimming competition.

Congratulations to the winners!

Principal Wong gives a closing speech.

Principal Wong and Principal Yau present a flag of appreciation to the parent representatives from the Parent-Teacher Association.

Charity Bazaar cum CoolSTEAMaker Festival

To promote STEAM education, the school held an event titled "The Charity Bazaar cum CoolSTEAMaker Festival". It was held on 22nd March, 2025. The event featured various STEAM-related exhibitions, workshops, hands-on activities, competitions, performances and games stalls which showcased students' talents beyond academics. Students and teachers set up different booths to show STEAM elements in different subjects.

In general, the event was meaningful. Students had a chance to put learning into practice. The school will continue to provide students with various platforms to unleash their potential.

Our teacher presents the Laser Engraving Chinese Chess to other students.

Students vote for the best Alcohol Ink Art.

Students and visitors watch the Robotics Competition.

The music teacher incorporates STEAM elements to make beautiful music.

20250331 HKAGE Satellite Centre Signing Ceremony cum Teachers' Sharing Session

Our school is honoured to be nominated as the 7th Gifted Education Satellite Centre of the Hong Kong Academy for Gifted Education (HKAGE). The aim of this new partnership is to promote gifted education and talent development in Hong Kong. A signing ceremony cum teachers' sharing session was held on 31 March 2025 to mark this new partnership between the HKAGE and our school. In the coming future, our school will collaborate with the HKAGE to host and co-organize courses for gifted students, as well as talks and seminars for teachers and parents.

Dr. Jimmy Wong, Executive Director of the HKAGE, and Principal Wong exchange documents at the ceremony.

Associate Principal Mr. Yeung shares our school's gifted education development at the teachers' sharing session.

Teachers and the representatives from the HKAGE take a group photo.

Presentation Day of Outstanding Works in Project-based Learning

To nurture our students' self-directed learning abilities and honour the excellence of their project-based learning (PBL), we hosted our inaugural PBL Day on May 16, 2025. A few senior teachers were invited to provide comprehensive feedback to all students in the hall, with a specific focus on enhancing their research skills and information analysis. The highlight of the event was the exceptional individual and group presentations delivered by selected students to their peers. As attentive audience, the peers were exposed to various strategies for data collection and the effective use of technology to organise and showcase their learning outcomes. The student presenters have received positive feedback from both judges and their fellow students. Notably, two S1 students and a group of S2 presenters were awarded the prestigious "Best Presenter" title, along with complimentary tickets to Hong Kong Disneyland. Congratulations to all participants for their outstanding efforts and achievements.

Students attend a feedback session before the presentations.

Mr. Yeung, the Assistant Principal, explains the rundown of the event and reminds students some basic manners.

This group of students express their ideas with hand gestures and facial expression.

During the Q&A session, students ask presenters questions about the presentation.

Joint Affiliated PLK Secondary School Beijing Study Tour

To broaden the horizons of our students, Po Leung Kuk has organised the “Po Leung Kuk Affiliated Secondary School Students Beijing Exchange and Study Tour” from 14/4/2025 - 18/4/2025. The tour offered students a wide range of learning experiences designed to foster collaboration, independent thinking, and resilience through sports and training. During the educational visit to Beijing, students gained first-hand insight into China’s latest developments and sports achievements, deepening their appreciation of the nation’s history, culture, and the accomplishments of its athletes. All these strengthen their sense of national pride.

Students take a photo at the entrance of the National Stadium, connecting them back to the historical moments of the 2008 Beijing Olympics.

Students observed the strong athletic ethos and legacy at Tsinghua University.

Principal Wong (left) pays a visit to teachers and students.

Students visit the Beijing Olympic Museum.

Life-wide Learning Day

On 22nd May 2025, the school organised a Life-wide Learning Day for students. The event provided a chance for students to learn in real contexts and complete tasks that were difficult to attain through classroom learning. Students also had a chance to learn the history and the economic development of China. They also learnt how to appreciate Chinese culture by engaging in different cultural activities. Here were some of the highlights:

Form 1 Chinese Cultural Activities

Form 1 students participated in cultural Chinese activities.

Form 2: Shenzhen and Dongguan Planning and Economic Development Exploration Trip

Students learn about the history of the Dongjiang water supply to Hong Kong.

Students are captivated by the robotic performance at the Dongguan Science and Technology Museum.

Form 3: Hong Kong Museum of History

Students take a group photo in front of the banner.

Students join a guided tour about the space program of China and learn the importance of outer space security.

Students and class teacher take a group photo at the National Security Exhibition Gallery.
